

## Flexible Solutions. **Budget Friendly.**

## Finally, dependable **bandwidth optimization** that cuts through the red tape.

Governments of every level are being called upon to maximize the security and reliability of their networks while ensuring agencies have access to data, online services, and applications. Given the budgets and unique requirements that local government agencies often face, it's critical to get the most out of the available bandwidth of any Internet connection — whether in a metropolitan area or in a remote location.

We understand the need for budget conscience bandwidth optimization solutions that are flexible, reliable, well-designed, and most importantly cost effective. Our revolutionary technology works on existing connections without changing infrastructure or adding bulky, complicated, and expensive equipment. We improve the overall performance of any link, anywhere, all while accelerating Internet speeds, and reducing overall data consumption.

### We cracked the code

- Cloud-based subscription model
- Scalable for any size operation or agency
- Fully managed service
- VPN over satellite, microwave, 3G/4G, and other high-latency links without performance penalty
- Works with any end user device: PCs, Laptops, Tablets, Smartphones
- Private server options available
- Fast, easy setup

### Compatible with all technologies

- Satellite
- Cellular
- Wi-Fi/WiMAX/Microwave
- DSL
- T1/T3
- Cable
- Fiber

## Feature List

### Optimization Techniques

- TCP Optimization
- Protocol Manipulation
- In-Stream Compression
- Block Level Deduplication
- Data Caching

### Protocols

- HTTP/HTTPS
- CIFS/SMB/Signed SMB
- FTP
- SMTP/POP3/IMAP
- MAPI
- Remote Desktop/Citrix
- MMS
- NFS

### Applications

- Sharepoint
- SAP
- Outlook/Exchange/OWA
- Lotus Notes/Domino

### Optimized Document Types

- Word/Excel 2003, 2007, 2010, 2013
- CAD
- SQL/TDS
- Print files
